DETAILED ACTION

Specification

1. 35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms, which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: "current is override" (p. 1, line 3); "switch cannot automatically jump off" (p. 1, line 11); "when override, the bimetal plate 170 will not be deformed" (p. 1, line 21), etc. The Examiner would like to reiterate that the only some of unclear, inexact or verbose terms have been mentioned above. Careful revision of entire specification is required in order to correct all deficiencies.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Art Unit: 2835

3. Claims 1 and 3, are rejected under 35 U.S.C. 102(e) as being clearly anticipated by US 6,400,250 to Wang.

Wang disclosed precisely identical switch structure (Fig. 7-9) as claimed in claims 1 and 3, including a connection member (8') with the recess (85') to accommodate a bimetal plate (7).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wang ('250) in view of US/6,072,381 to Yu.

Regarding claim 2, Wang disclosed all of the claim limitations as apply to claim 1, but did not disclose two ribs to accommodate the bimetallic plate.

Yu disclosed a thermal switch (Fig. 3a), wherein the bimetallic plate (31) is extending between two ribs extending from an inside of switch casing.

Since the invention of Wang and of Yu are from the same field of endeavor (bimetallic thermal switches), the purpose of the ribs disclosed by Yu would be recognized in the invention of Wang.

It would have been obvious to a person of ordinary skill in the thermal switch art at the time the invention was made to provide switch of Wang with two ribs as taught by Yu, in order

Art Unit: 2835

to provide said switch of Wang with the "seesaw" switching characteristic (Yu, column 1, lines 44+).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US/5760672, 5539371, 5828284, 4371859, 6452125, 3569888, 6275134, 4363016, and 6480090 disclosed bimetallic thermal switches.
